

Neurolinguistics

Fall 2024

Welcome to Neurolinguistics! The Fall 2024 course information and materials are below. Course materials from previous semesters are archived [here](#).

Syllabus

Course Description: Neurolinguistics is a seminar on language and the brain. For the first few weeks, you will build a foundation of knowledge, first on how brains work (neurons, networks, and anatomy) and later on the methods researchers use to study language in the brain. The remainder of the course will explore the literature on different topics in language and the brain, including various levels of linguistics (phonology, morphology, syntax), acquisition, evolution, signed languages, and more.

Prerequisites: This course is open to all graduate students and upper-level undergraduates. No specific background in neuroscience or linguistics is necessary to participate in the course. However, this is an advanced seminar-style course; students looking for a lecture format will not enjoy this course.

Instructor: [Dr. Katie Schuler \(she/her\)](#)

- You can call me **Katie**

Seminars: Thursday at 1:45pm in TBD

Office Hours: The linguistics department is located on the 3rd floor of 3401-C Walnut street, between Franklin's Table and Modern Eye.

- Katie Schuler: TBD in 314C

Requirements: This is an advanced STEM seminar. Below are the major requirements, but please read the [tips for seminars](#) to understand further:

- **Reading prep:** Each week, you will be responsible for preparing for the discussion by completing the assigned reading. As you read, you are responsible for asking questions and beginning the discussion of the paper in our reading annotation tool, Perusall.
- **Discussion leader:** Several times throughout the semester (but not every week), you will serve as discussion leader for a paper with one or two other students. As discussion leader, your group will be responsible for presenting the paper, including summarizing (motivation, research questions, approach, and findings) and leading a discussion of the work.
- **Final paper:** You will select a paper of interest to you (within the bounds of language and the brain) and write a research analysis of the work (in the form of a nature “News & Views” paper; example [here](#)). There are a few checkpoints leading up to this final paper (including peer review) to help you make progress.

Grading:

- 30% Participation in discussion (including reading prep in Perusall)
- 40% Discussion leader
- 30% Final paper (including several check-points throughout the semester: paper selection, outline, drafts, and peer review)

Extensions: For assignments related to the final paper, extensions of up to 1 week will be granted for any reason. Beyond that, you can turn in any missed writing assignment for half-credit (50%).

Accommodations: I will support any accommodations arranged through Disability Services via the [Weingarten Center](#) and to make alternate arrangements when class conflicts with a religious holiday. Please notify me as soon as possible if you require accommodations.

Extra credit: There is no extra credit in the course. However, students can submit any missed reading prep by the end of the semester for half credit (50%). To ensure fair treatment, all students will receive a 1% “bonus” to their final course grade: 92.54% will become 93.54%.

Support: Asking for help is a sign of strength! I hope you’ll reach out to me if you need help (academically or otherwise). I also want you to be aware of Penn’s Academic & Wellness Resources

Resources

In addition to our course website, we will use the following:

- [canvas](#)- for posting grades
- [perusall](#) - for reading annotations
- [ed discussion](#) - for announcements and questions

Other helpful materials and resources:

- [tips for seminars](#)

Please consider using these Penn resources this semester:

- [Weingarten Center](#) for academic support and tutoring.
- [Wellness at Penn](#) for health and wellbeing.

Final paper

There are 7 checkpoints leading up to (and including) the final paper, due on the following Mondays at noon. Extensions of up to 1 week will be granted for any reason. Beyond that, you can turn in any missed checkpoint for half-credit (50%) by the end of the semester.

- [Checkpoint 1: Topic selection due Sep 23](#)
- [Checkpoint 2: Outline due Oct 7](#)
- [Checkpoint 3: Peer review 1 due Oct 21](#)
- [Checkpoint 4: Revised outline due Nov 4](#)
- [Checkpoint 5: Paper draft due Nov 18](#)
- [Checkpoint 6: Peer review 2 due Dec 5](#)
- [Checkpoint 7: Final paper due Dec 16](#)

Schedule

 Under Construction

This is the first draft of the schedule. You should see your name 3 times, mostly on topics you expressed an interest in.

Week	Date	Topic & Discussion Leaders	Due
1	Aug 29	Getting started Katie (Instructor)	
2	Sep 5	CNS, neurons, and methods Katie (Instructor)	
3	Sep 12	Perspective Krakauer et al (2017): Chloe, Dillon, Erica Embick & Poeppel (2015): Esther, Mahir, Sophia	
4	Sep 19	Networks Malik-Moraleda et al 2022 - Esther, Jo, NaFedorenko et al 2024- Mahir, Sophia, Jaehyuk	

Week	Date	Topic & Discussion Leaders	Due
5	Sep 26	Phonemes & Syntax Daniel, Dillon, Aymeric, Ninjin, Tali, Jaehyuk	CP1 Topic selection (due 9/23)
6	Oct 3	Fall break (no class)	
7	Oct 10	Acquisition I Carey, Leann, Katie, Karis, Ninjin, Tali, Nwai, Na	CP2 Outline (due 10/7)
8	Oct 17	No class (Katie @ conference)	
9	Oct 24	Acquisition II Alyssa, Chloe, Daniel, Dillon, Esther, Aymeric, Jo, Jaehyuk, Kamelija	CP3 Peer review 1 (due 10/21)
10	Oct 31	Bilingualism I Alyssa, Erica, Kamelija, Sophia, Daniel, Aymeric	
11	Nov 7	Symposium (Zoom): Neural Coding in Speech, Language and Cognition	CP4 Revised outline (due 11/4)
12	Nov 14	Bilingualism II Carey, Chloe, Leann, Katie, Na, Karis, Jo	
13	Nov 21	Sign language Carey, Leann, Katie, Karis, Tali, Nwai	CP5 Paper draft (due 11/18)
14	Nov 28	Thanksgiving break (no class)	Peer Review II (Tues)
15	Dec 5	Evolution Alyssa, Erica, Ninjin, Kamelija, Nwai, Mahir	CP6 Peer review 2 (due 12/5)
16	Dec 9	No class	
17		CP7 Final paper (due 12/16)
